

STRAW-PROJECT

Research about STress At Work

WE ARE RECRUITING!

We are an international research team at the Department of Public Health & Primary Care at Ghent University, Belgium and the Department of Intelligent Systems at the Jožef Stefan Institute, Slovenia.

We want to know more about the sources, consequences, and context of day-to-day stress at work.

Stress at work sounds familiar, doesn't it?

If you...

- speak Dutch or Slovene
- use an Android smartphone
- work between 80-100%
- are employed in an academic setting

...you are the perfect participant for our study!
